

All the Important People in Institutions, Universities, Schools – around the World but from America

By Cornel West with Sirohi, French philosophers and Slovenian Marxists

I. What did you ask for?

I only meant love and life – Sirohi

I meant philosophy, liberation theory, Malcolm X and what Sirohi said. – Cornel West.

II. Idealism is this mix from America

A love for idealist things like paintings on women extraneated – black and white dazzling together, we add Indian dazzling.

Cornel West argues just get the number of ideas in A Draft, this is how to aleatorily construct them – something Sirohi likes – the dazzling red carpet love admitted is then a film critic choice that one just walks into the man who is though elliptical, he meant in a certain fashion, we just were there 'da-sein'.
